DETAIL SPECIFICATION SHEET

CONNECTORS, ELECTRICAL MODULAR, TYPE IV, CONNECTOR, 100 PIN, RIGHT ANGLE CONTACT TAILS ON .100 CENTERS

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the product described herein shall consist of this specification sheet and MIL-C-28754.

FIGURE 1. Dimensions and configurations.
FIGURE 1. Dimensions and configurations – Continued.
### NOTES:

1. Dimensions are in inches.
2. Metric equivalents are given for information only and are based upon 1.00 inch = 25.4 mm.
3. Unless otherwise specified, tolerances are ± .005 (.13 mm) inch for three place decimals, ± .01 (.3 mm) inch for two place decimals and ± 2° for angles.
4. Flash around blade contacts not to exceed .010 (.25 mm) inch from the surface of the insulator and shall be firmly attached.
5. Pin shield shall be marked with contact numbers 1, 50, 51 and 100 in contrasting color ink .06 (1.5 mm) inch high.
6. Single or multiple piece construction is optional provided that the end requirements of the drawing are met. It is permissible for the connector body to be installed in either an aluminum or thermoplastic shell which provides the pin shield and key pin hole features. The thermoplastic shall be Type GLT-30F.
7. Dimension prior to solder coating.
8. Dimensions apply after plating.
9. See Table I for key pin hole size and body material.
10. Contact engagement length.
11. Shaded area shall be solder coated.
12. This connector is not to be used with ceramic circuit boards.
13. Connector shall be marked in approximate location shown with part number, manufacturer’s number and date code with contrasting ink in characters .06 (1.5 mm) inch high.

NOTES:

1. Dimensions are in inches.
2. Metric equivalents are given for information only and are based upon 1.00 inch = 25.4 mm.
3. Unless otherwise specified, tolerances are ± .005 (.13 mm) inch for three place decimals, ± .01 (.3 mm) inch for two place decimals and ± 2° for angles.
4. Flash around blade contacts not to exceed .010 (.25 mm) inch from the surface of the insulator and shall be firmly attached.
5. Pin shield shall be marked with contact numbers 1, 50, 51 and 100 in contrasting color ink .06 (1.5 mm) inch high.
6. Single or multiple piece construction is optional provided that the end requirements of the drawing are met. It is permissible for the connector body to be installed in either an aluminum or thermoplastic shell which provides the pin shield and key pin hole features. The thermoplastic shall be Type GLT-30F.
7. Dimension prior to solder coating.
8. Dimensions apply after plating.
9. See Table I for key pin hole size and body material.
10. Contact engagement length.
11. Shaded area shall be solder coated.
12. This connector is not to be used with ceramic circuit boards.
13. Connector shall be marked in approximate location shown with part number, manufacturer’s number and date code with contrasting ink in characters .06 (1.5 mm) inch high.

---

**FIGURE 1. Dimensions and configurations – Continued.**
REQUIREMENTS:

Dimensions and configuration: See Figure 1 and Table I.

Materials: Contacts shall be either copper alloy sheet or strip, UNS Number C72500, temper 1/4 hard minimum, in accordance with ASTM B 122/B122M or brass, ASTM B36/B36M, UNS number C26000, temper H02.

Connector body shall be either polyetherimide, Type GLT-20F or GLT-30F, molded thermoplastic in accordance with MIL-M-24519 or molding plastic, diallyl phthalate, Type GDI-30F or Type SDG-F in accordance with ASTM D5948.

The pin shield shall be aluminum alloy 5052 in accordance with SAE AMS4017 or SAE-AMS-QQ-A-250/8, temper H34 or Type GLT-20F or GLT-30F, molded thermoplastic in accordance with MIL-M-24519. Pin shield thickness for molded thermoplastic shall be 0.020 (.51 mm) inch minimum.

Plating: Contacts shall be finished on all exposed surfaces. The contact engagement length indicated shall be finished with gold plate. MIL-DTL-45204, Type II, Grade C, Class 1, 0.000050 (.00013 mm) inch minimum thickness over nickel plating, SAE-AMS-QQ-N-290, Class 1, 0.000050 (.00013 mm) inch minimum thickness.

Selectively solder coat the leads as shown in the shaded area in accordance with J-STD-006, SN60 or SN63, to a thickness of 0.0005 (.013 mm) inch to 0.003 (.08 mm) inch using flux, J-STD-004, Type RMA.

All aluminum alloy parts shall be anodic coated in accordance with MIL-A-8625, Type III, Class 2, black.

Key pin holes: For M28754/47-03 material, .095 ± .001 (2.41 ± .03 mm) inch diameter x .150 (3.81 mm) inch deep.

For M28754/47-02 material, .098 ± .001 (2.48 ± .03 mm) inch diameter x .150 (3.81 mm) inch deep.

For M28754/47-01 material, .114 +.000-.005 (2.90 +.00-.13 mm) inch diameter x .150 (3.81 mm) inch deep.

C’bore .134 +.005-.000 (3.40 +.13-.00 mm) inch dia x .020 +.005-.000 (.51 +.13-.00 mm) inch deep.

Three equally spaced 0.010 (.25 mm) inch rad beads x .150 (3.81 mm) inch deep around the periphery of the .114 (2.90 mm) inch diameter shall be utilized.

Electrical requirements:

Dielectric withstanding voltage: Connector shall be tested in accordance with test procedure EIA-364-20, Method A, test condition IV, test voltage 600 VAC (rms) 60 Hz, or 850 VDC.

Low level (dry circuit): Voltage drop shall not exceed 36 millivolts. Wire size is not applicable.

Contact resistance: Voltage drop shall not exceed 36 millivolts. Current Rating; 3 Amp.

Temperature rating: -55°C to +125°C.

Voltage rating: 300 Volts, AC (rms), at sea level.
MIL-DTL-28754/47C

Durability: In accordance with MIL-C-28754 and shall not exceed 36 millivolts.

Solderability: In accordance with MIL-C-28754.

Military part number: M28754/47- (Dash Number from Table I)

Warning: The GLT-20F or GLT-30F may be susceptible to stress cracking when exposed to certain cleaning solvents.

First article testing: Perform the applicable tests as specified in MIL-C-28754 and the appendix thereto.

Changes from previous issue. The margins of this specification are marked with vertical lines to indicate where changes from the previous issue were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the previous issue.
