DETAIL SPECIFICATION SHEET

PANELBOARD, POWER DISTRIBUTION,  
PORTABLE, WEATHERPROOF, TYPE I, CLASS 1,  
CONFIGURATION 5: 208Y/120 VOLT, 100 KILOWATT

Inactive for new design after 13 March 2003

This specification is approved for use by all departments and agencies of the Department of Defense.

The requirements for acquiring the product described herein shall consist of this specification sheet and the issue of MIL-DTL-29183 listed in that issue of the Department of Defense Index of Specifications and Standards (DoDISS) specified in the solicitation.

REQUIREMENTS: The distribution panel shall be as specified herein and in accordance with figure 1 and tables I and II. Required accessory equipment shall be as specified in table III.

Physical:

Weight: The weight shall not exceed 455 pounds (206 kilograms).

Dimensions (maximum):

Length: 65.0 inches (1651 millimeters (mm))

Width: 32.0 inches (813 mm)

Height: 35.0 inches (889 mm)

Stability: The vertical center of gravity shall be not more than 21.0 inches (533 mm) above level ground. Additional stability requirements shall apply in accordance with MIL-DTL-29183.

Paralleling cable access panel: Required (see MIL-DTL-29183).

Electrical:

Input: The input to the distribution panel shall be 208Y/120 volt (V), 3-phase (ø), 4-pole (P), 5-wire (W), 60 Hertz (Hz).

Bus capacity: The bus bar capacities shall be 800 amperes (A) (see figure 1).

Circuit breaker: The number of poles and current rating shall be as indicated in table I herein and the voltage rating shall be sufficient for the intended circuit. An interlock bar shall be provided between the two main breakers to preclude both breakers from being in the "on" position at the same time. Interlocking of circuit breakers shall be accomplished through a mechanical interlock. Interlocking shall be of the break before make type; of two interlocked circuits, one cannot be made (circuit closed or energized) until the other is first broken (circuit open or de-energized). Interlocking between the first circuit breaker and the second circuit breaker shall be provided to preclude the first circuit breaker from being closed when the second circuit breaker is closed, and to preclude the second circuit breaker from being closed when the first circuit breaker closed.

PIN: The government part identification number (PIN) is as follows:
