PERFORMANCE SPECIFICATION SHEET

SEMICONDUCTOR DEVICE, TRANSISTOR, NPN, SILICON, POWER DARLINGTON,
TYPES 2N6283 AND 2N6284, JAN, JANTX, AND JANTXV

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the product described herein shall consist of this specification sheet and [MIL-PRF-19500](#).

1. SCOPE

1.1 Scope. This specification covers the performance requirements for NPN silicon power Darlington transistors. Three levels of product assurance are provided for each encapsulated device type as specified in [MIL-PRF-19500](#).

1.2 Physical dimensions. The device package style is TO-204AA (similar to TO-3) in accordance with [figure 1](#).

1.3 Maximum ratings. Unless otherwise specified, $T_C = +25^\circ\text{C}$.

Types	P_T		$R_{\theta JC}$ max	V_{CBO}	V_{CEO}	V_{EBO}	I_C	I_B	T_J and T_{STG}
	$T_C = +25^\circ\text{C}$ (1)	$T_C = +100^\circ\text{C}$ (2)							
	<u>W</u>	<u>W</u>	<u>°C/W</u>	<u>V dc</u>	<u>V dc</u>	<u>V dc</u>	<u>A dc</u>	<u>A dc</u>	<u>°C</u>
2N6283	175	87.5	0.857	80	80	7	20	0.5	-65 to +200
2N6284	175	87.5	0.857	100	100	7	20	0.5	-65 to +200

- (1) Derate linearly at 1.17 W/°C above $T_C > +25^\circ\text{C}$ (see [figure 2](#)).
- (2) Derate linearly at .875 W/°C above $T_C > +100^\circ\text{C}$ (see [figure 2](#)).

Comments, suggestions, or questions on this document should be addressed to DLA Land and Maritime, ATTN: VAC, P.O. Box 3990, Columbus, OH 43218-3990, or emailed to semiconductor@dla.mil. Since contact information can change, you may want to verify the currency of this address information using the ASSIST Online database at <https://assist.dla.mil>.

MIL-PRF-19500/504F
w/AMENDMENT 1

1.4 Primary electrical characteristics. Unless otherwise specified, $T_C = +25^\circ\text{C}$.

Limit	h_{FE1} (1)	h_{FE2} (1)	$V_{CE(sat)1}$	$V_{CE(sat)2}$	$V_{BE(sat)}$	Pulse response (2)

2. APPLICABLE DOCUMENTS

2.1 General. The documents listed in this section are specified in sections 3, 4, or 5 of this specification. This section does not include documents cited in other sections of this specification or recommended for additional information or as examples. While every effort has been made to ensure the completeness of this list, document users are cautioned that they must meet all specified requirements of documents cited in sections 3, 4, or 5 of this specification, whether or not they are listed.

2.2 Government documents.

2.2.1 Specifications, standards, and handbooks. The following specifications, standards, and handbooks form a part of this document to the extent specified herein. Unless otherwise specified, the issues of these documents are those cited in the solicitation or contract.

DEPARTMENT OF DEFENSE SPECIFICATIONS

[MIL-PRF-19500](#) – Semiconductor Devices, General Specification for.

DEPARTMENT OF DEFENSE STANDARDS

[MIL-STD-750](#) – Test Methods for Semiconductor Devices.

(Copies of these documents are available online at <http://quicksearch.dla.mil> or <https://assist.dla.mil> or from the Standardization Document Order Desk, 700 Robbins Avenue, Building 4D, Philadelphia, PA 19111-5094.)

2.3 Order of precedence. Unless otherwise noted herein or in the contract, in the event of a conflict between the text of this document and the references cited herein, the text of this document takes precedence. Nothing in this document, however, supersedes applicable laws and regulations unless a specific exemption has been obtained.

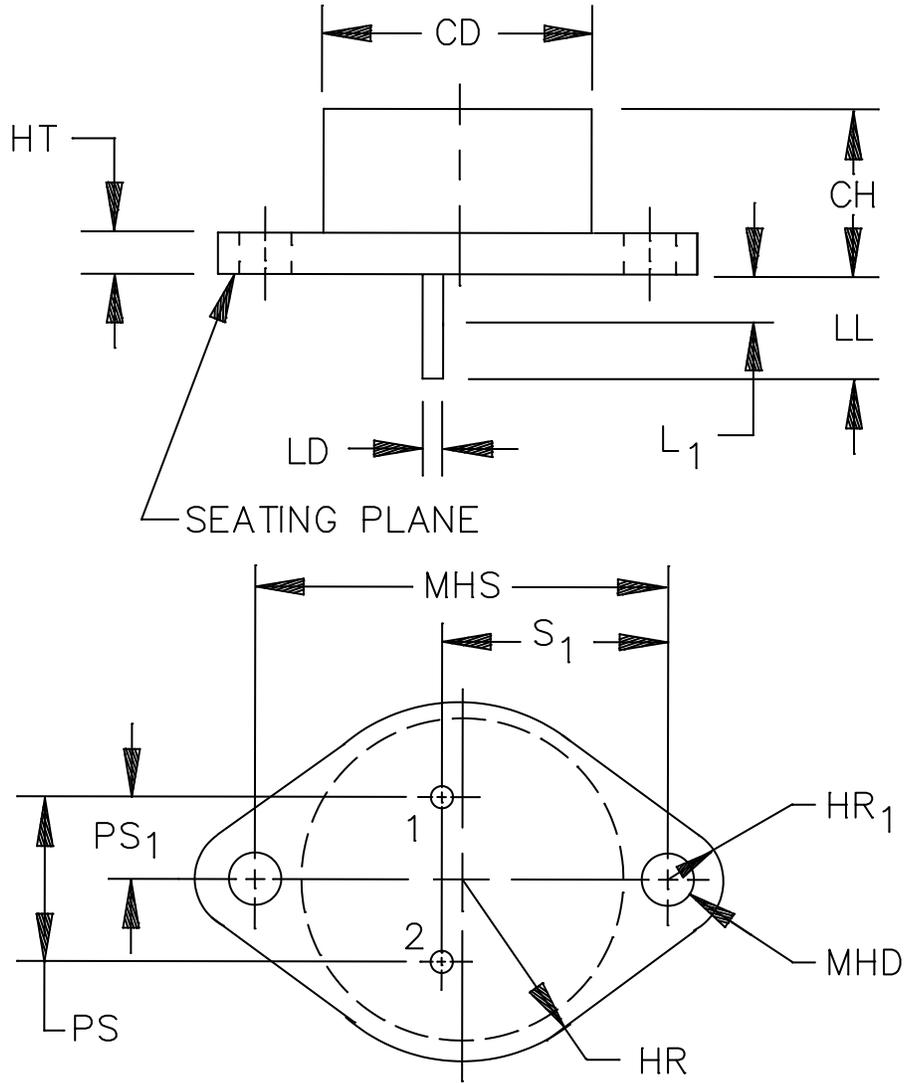

FIGURE 1. Physical dimensions (TO-204AA, similar to TO-3).

S ₁	.655	.675	16.64	17.15	7

NOTES:

1. Dimensions are in inches. Millimeters are given for general information only.
2. Body contour is optional within zone defined by dimension CD.
3. At both ends.
4. Both terminals.
5. Dimension LD applies between L₁ and LL. Lead diameter shall not exceed twice dimension LD within dimension L₁. Diameter is uncontrolled in dimension L₁.
6. Two holes.
7. These dimensions shall be measured at points .050 inch (1.27 mm) to .055 inch (1.40 mm) below the seating plane. When gauge is not used, measurement shall be made at seating plane.
8. The seating plane of the header shall be flat within .001 inch (0.03 mm) concave to .004 inch (0.10 mm) convex inside a .930 inch (23.62 mm) diameter circle on the center of the header and flat within .001 inch (0.03 mm) concave to .006 inch (0.15 mm) convex overall.
9. Terminal 1 is the emitter, terminal 2 is base. The collector shall be electrically connected to the case.
10. In accordance with ASME Y14.5M, diameters are equivalent to ϕ symbology.

FIGURE 1. Physical dimensions (TO-204AA, similar to TO-3) – Continued.

MIL-PRF-19500/504F
w/AMENDMENT 1

3. REQUIREMENTS

3.1 General. The individual item requirements shall be as specified in MIL-PRF-19500 and as modified herein.

3.2 Qualification. Devices furnished under this specification shall be products that are manufactured by a manufacturer authorized by the qualifying activity for listing on the applicable qualified manufacturer's list (QML) before contract award (see 4.2 and 6.3).

3.3 Abbreviations, symbols, and definitions. The abbreviations, symbols, and definitions used herein shall be as specified in MIL-PRF-19500 and as follows:

I_M	-	The measurement current applied to forward bias the junction for measurement of V_{BE} .
I_H	-	The collector current applied to the device under test during the heating period.
t_H	-	The duration of the applied heating power pulse.
t_{sw}	-	Sample window time during which final V_{BE} measurement is made.

3.4 Interface requirements and physical dimensions. The Interface requirements and physical dimensions shall be as specified in MIL-PRF-19500 and figure 1 (TO-204AA, similar to TO-3).

3.4.1 Lead finish. The lead finish shall be solderable in accordance with MIL-STD-750, MIL-PRF-19500, and herein. Where a choice of lead finish or formation is desired, it shall be specified in the acquisition document (see 6.2).

3.4.2 Polarity. The polarity of the device type shall be as shown on figure 1.

3.5 Marking. Marking shall be in accordance with MIL-PRF-19500.

3.6 Electrical performance characteristics. Unless otherwise specified herein, the electrical performance characteristics are as specified in 1.3, 1.4, and table I herein.

3.7 Electrical test requirements. The electrical test requirements shall be as specified in table I.

3.8 Workmanship. Semiconductor devices shall be processed in such a manner as to be uniform in quality and shall be free from other defects that will affect life, serviceability, or appearance.

4. VERIFICATION

4.1 Classification of inspections. The inspection requirements specified herein are classified as follows:

- a. Qualification inspection (see 4.2).
- b. Screening (see 4.3).
- c. Conformance inspection (see 4.4 and tables I and II).

4.2 Qualification inspection. Qualification inspection shall be in accordance with MIL-PRF-19500, and as specified herein.

4.2.1 Group E qualification. Group E inspection shall be performed for qualification or re-qualification only. In case qualification was awarded to a prior revision of the specification sheet that did not request the performance of table II tests, the tests specified in table II herein that were not performed in the prior revision shall be performed on the first inspection lot of this revision to maintain qualification.

MIL-PRF-19500/504F
w/AMENDMENT 1

4.3 Screening (JANTX and JANTXV levels only). Screening shall be in accordance with table E-IV of MIL-PRF-19500, and as specified herein. The following measurements shall be made in accordance with table I herein. Devices that exceed the limits of table I herein shall not be acceptable.

Screen (see table E-IV of MIL-PRF-19500)	Measurement
	JANTX and JANTXV levels only
3c (1)	Thermal impedance, see 4.3.1
9	I_{CEX1} and h_{FE1}
11	I_{CEX1} and h_{FE1}
12	See 4.3.2
13	See subgroup 2 of table I herein. ΔI_{CEX1} = 100 percent of initial value or 2 μ A dc, whichever is greater. Δh_{FE1} = \pm 40 percent of initial value.

- (1) Thermal impedance shall be performed anytime after temperature cycling, screen 3a, and does not need to be repeated in screening requirements.

4.3.1 Thermal impedance. The thermal impedance measurements shall be performed in accordance with test method 3131 of MIL-STD-750 using the guidelines in that test method for determining I_M , I_H , t_H , t_{SW} , (and V_H where appropriate). Measurement delay time (t_{MD}) = 70 μ s max. The thermal impedance limit used in screen 3c and subgroup 2 of table I herein shall be set statistically by the supplier. See table II, subgroup 4 herein.

4.3.2 Power burn-in conditions. The power burn-in conditions shall be as follows: $T_J = +162.5^\circ\text{C} \pm 12.5^\circ\text{C}$; $V_{CE} \geq 10$ V dc. NOTE: No heat sink or forced air cooling on the devices shall be permitted.

4.4 Conformance inspection. Conformance inspection shall be in accordance with MIL-PRF-19500, and as specified herein.

4.4.1 Group A inspection. Group A inspection shall be conducted in accordance with table E-V of MIL-PRF-19500 and table I herein. Electrical measurements (end-points) shall be in accordance with table I, subgroup 2 herein.

4.4.2 Group B inspection. Group B inspection shall be conducted in accordance with the tests and conditions specified for subgroup testing in table E-VIB (JAN, JANTX, and JANTXV) of MIL-PRF-19500 and herein. Electrical measurements (end-points) shall be in accordance with table I, subgroup 2 herein.

Subgroup	Method	Conditions
B3	1037	For solder die attach: $T_A \leq +35^\circ\text{C}$, $V_{CE} \geq 10$ V dc; 2,000 cycles.
B3	1027	For eutectic die attach: $T_A \leq +35^\circ\text{C}$ adjust P_T to achieve $T_J = +150^\circ\text{C}$ minimum, $V_{CE} \geq 10$ V dc.
B5	3131	Not applicable.

MIL-PRF-19500/504F
w/AMENDMENT 1

4.4.3 Group C inspection. Group C inspection shall be conducted in accordance with the conditions specified for subgroup testing in table E-VII of MIL-PRF-19500 and as follows. Electrical measurements (end-points) shall be in accordance with table I, subgroup 2 herein.

<u>Subgroup</u>	<u>Method</u>	<u>Conditions</u>
C2	2036	Test condition A, weight = 10 lbs (4.54 Kg), t = 15s.
C5	3131	See 4.3.1, $R_{\theta JC} = 0.857^{\circ}\text{C/W}$ (maximum).
C6	1037	For solder die attach: $T_A \leq +35^{\circ}\text{C}$, $V_{CE} \geq 10\text{ V dc}$; 6,000 cycles.
C6	1026	For eutectic die attach: $T_A \leq +35^{\circ}\text{C}$ adjust P_T to achieve $T_J = +150^{\circ}\text{C}$ minimum, $V_{CE} \geq 10\text{ V dc}$.

4.4.4 Group E inspection. Group E inspection shall be conducted in accordance with the conditions specified for subgroup testing in appendix E, table E-IX of MIL-PRF-19500 and as specified in table II herein. Electrical measurements (end-points) shall be in accordance with table I, subgroup 2 herein.

4.5 Method of inspection. Methods of inspection shall be as specified in the appropriate tables and as follows.

4.5.1 Pulse response measurements. The conditions for pulse response measurement shall be as specified in section 4 of MIL-STD-750.

MIL-PRF-19500/504F

Temperature-Power Derating Curve

$T_c=25^\circ\text{C}$ 2N6283 and 2N6284, $T_j=175^\circ\text{C}$ max.

DC Operation

Thermal Resistance Junction to Case = 0.857°C/W

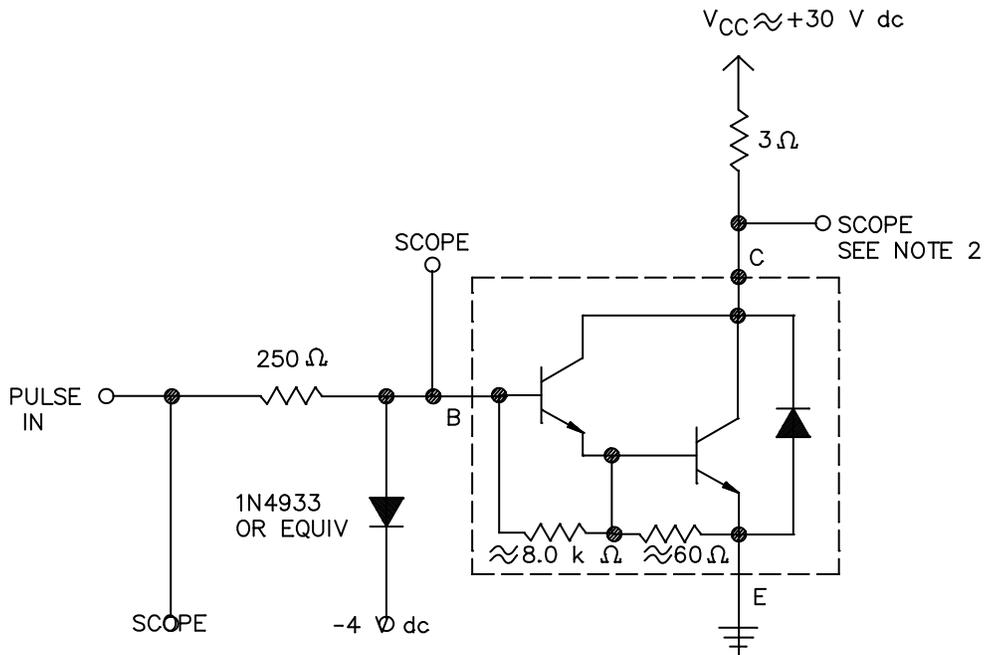

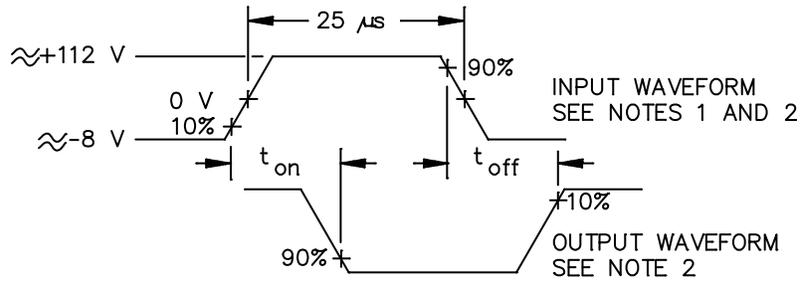

Note: Max Finish-Alloy Temp = 175.0°C

NOTES:

1. All devices are capable of operating at $\leq T_j$ specified on this curve. Any parallel line to this curve will intersect the appropriate power for the desired maximum T_j allowed.
2. Derate design curve constrained by the maximum junction temperatures and power rating specified (see 1.3 herein).
3. Derate design curve chosen at $T_j \leq +150^\circ\text{C}$, where the maximum temperature of electrical test is performed.
4. Derate design curve chosen at $T_j \leq +125^\circ\text{C}$, and $+110^\circ\text{C}$ to show power rating where most users want to limit T_j in their application.

FIGURE 2. Temperature-power derating curve for types 2N6283 and 2N6284.

MIL-PRF-19500/504F
w/AMENDMENT 1

NOTES:

1. The input waveform is supplied by a pulse generator with the following characteristics:
 $t_r \leq 20 \text{ ns}$, $t_f \leq 20 \text{ ns}$, $Z_{OUT} = 50 \text{ ohms}$, $PW = 25 \mu\text{s}$, duty cycle ≤ 2 percent.
2. Output waveforms are monitored on an oscilloscope with the following characteristics:
 $t_r \leq 20 \text{ ns}$, $Z_{in} \geq 20 \text{ k}\Omega$, $C_{in} \leq 11.5 \text{ pf}$.
3. Resistors shall be non-inductive types.
4. The dc power supplies may require additional by-passing in order to minimize ringing.

FIGURE 3. Pulse response test circuit.

w/AMENDMENT 1

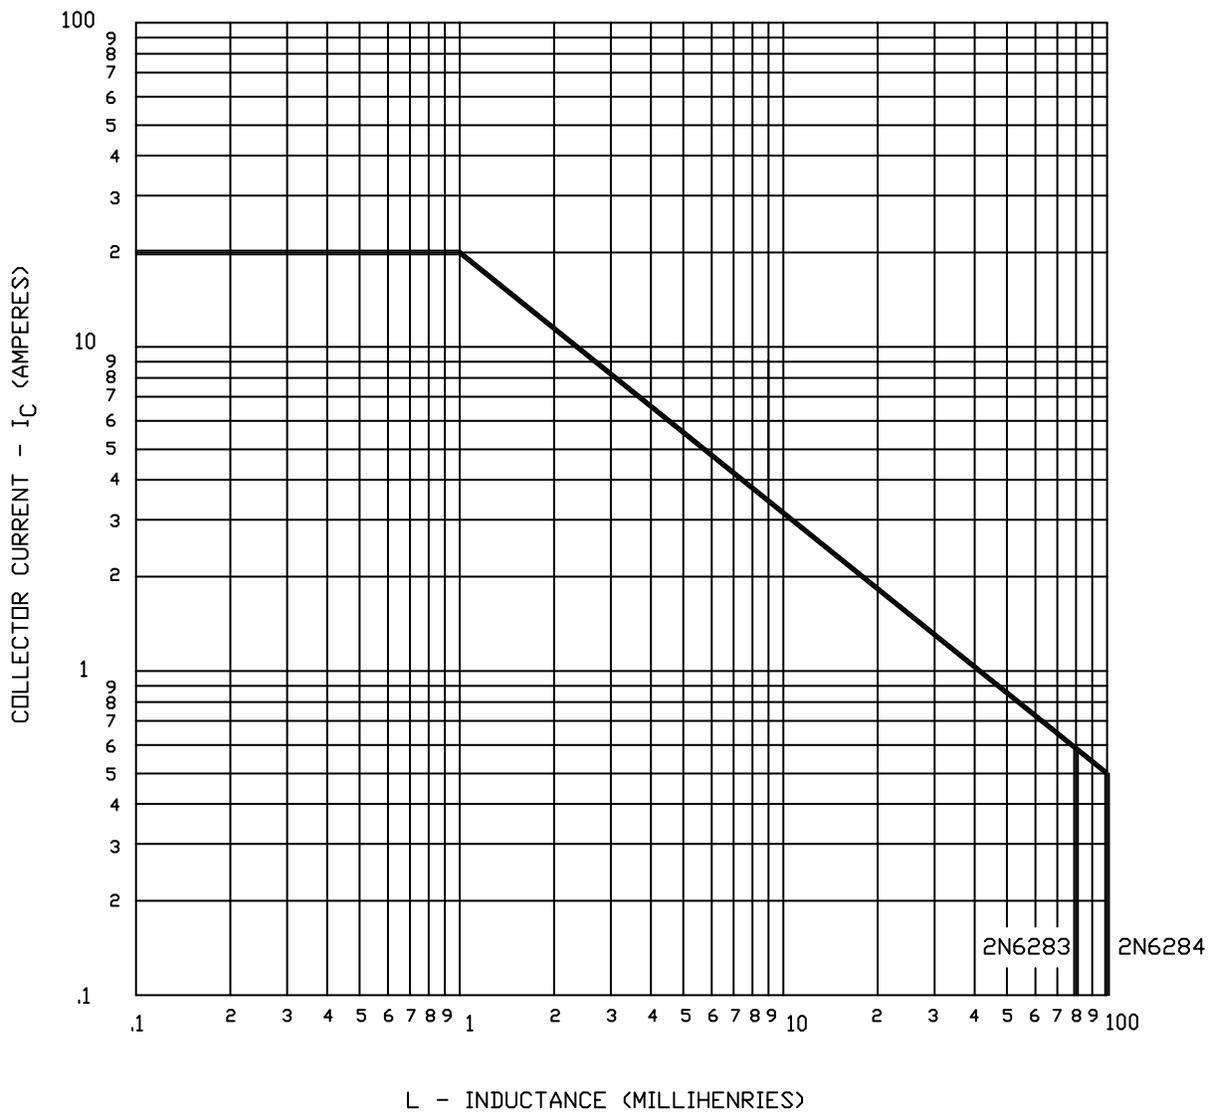

FIGURE 5. Safe operating area for switching between saturation and cutoff (unclamped inductive load).

5. PACKAGING

5.1 Packaging. For acquisition purposes, the packaging requirements shall be as specified in the contract or order (see 6.2). When packaging of materiel is to be performed by DoD or in-house contractor personnel, these personnel need to contact the responsible packaging activity to ascertain packaging requirements. Packaging requirements are maintained by the Inventory Control Point's packaging activities within the Military Service or Defense Agency, or within the Military Service's system commands. Packaging data retrieval is available from the managing Military Department's or Defense Agency's automated packaging files, CD-ROM products, or by contacting the responsible packaging activity.

6. NOTES

(This section contains information of a general or explanatory nature that may be helpful, but is not mandatory. The notes specified in [MIL-PRF-19500](#) are applicable to this specification.

6.1 Intended use. Semiconductors conforming to this specification are intended for original equipment design applications and logistic support of existing equipment.

6.2 Acquisition requirements. Acquisition documents should specify the following:

- a. Title, number, and date of this specification.
- b. Packaging requirements (see 5.1).
- c. Lead finish (see [3.4.1](#)).
- d. The complete Part or Identifying Number (PIN), see section [1](#).

6.3 Qualification. With respect to products requiring qualification, awards will be made only for products which are, at the time of award of contract, qualified for inclusion in Qualified Manufacturers List (QML 19500) whether or not such products have actually been so listed by that date. The attention of the contractors is called to these requirements, and manufacturers are urged to arrange to have the products that they propose to offer to the Federal Government tested for qualification in order that they may be eligible to be awarded contracts or orders for the products covered by this specification. Information pertaining to qualification of products may be obtained from DLA Land and Maritime, ATTN: VQE, P.O. Box 3990, Columbus, OH 43218-3990 or e-mail vqe.chief@dla.mil. An online listing of products qualified to this specification may be found in the Qualified Products Database (QPD) at <https://assist.dla.mil>.

6.4 Changes from previous issue. The margins of this specification are marked with vertical lines to indicate where changes from the previous issue were made. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations and relationship to the last previous issue.
