PERFORMANCE SPECIFICATION SHEET

CONNECTORS, PLUG, ELECTRICAL, COAXIAL, RADIO FREQUENCY
(SERIES TNC (CABLED) – PIN CONTACT, CLASS 2) FOR SEMI-RIGID CABLE

Reinstated after 12 June 2018 and may be used for new and existing designs and acquisitions.

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the connectors described herein shall consist of this specification and the latest issue of MIL-PRF-39012.

NOTES:
1. Dimensions are in inches.
2. Metric equivalents are given for general information only.
3. Metric equivalents are in parentheses.
4. If applicable, wrench flats are to accommodate standard wrench openings in accordance with FED-STD-H28, appendix 10.
5. Dimension .650 (16.51 mm) is the largest overall diameter of the connector.
6. All undimensioned pictorial configurations are for reference purposes only.
7. Dimensions 1.250 (31.75 mm) defines the overall length of the connector when assembled to the cable.
8. Series TNC, pin contact interface per MIL-STD-348.

FIGURE 1. General configuration.
Leakage (pressurized connectors): Not applicable.

Center contact retention: 6 pounds, minimum axial force. Applicable to captivated-center-contact connectors only.

Voltage standing wave ratio (VSWR): From 2,000 to 15,000 MHz, or approximately 80 percent of upper cutoff frequency of the cable, whichever is lower, 1.35 maximum.

Swept frequency VSWR test setup:

Item 6 – VSWR shall be less than 1.02 + .003 F (F in GHz).

Item 16 – VSWR shall be less than 1.02 + .003 F (F in GHz).

Second step of VSWR checkout procedure – VSWR shall be less than 1.06 + .007 F (F in GHz).

Group B inspection – VSWR shall be less than 1.05 + .005 F (F in GHz).

Qualification and group C inspection – VSWR shall not exceed 1.10.

Connector durability: 500 cycles at 12 cycles per minute maximum. The connector shall meet the mating characteristics and force to engage and disengage requirements.

Contact resistance: In milliohms, maximum:

Dielectric withstanding voltage: MIL-STD-202-301. 1,500 volts rms, minimum at sea level.

Vibration, high frequency: MIL-STD-202-204, test condition B, except the method of mounting shall be approved by the qualifying activity.

Thermal shock: MIL-STD-202-107, test condition B, except test high temperature shall be 115°C.

Moisture resistance: MIL-STD-202-106. No measurements at high humidity. Insulation resistance shall be at least 200 megohms within 5 minutes after removal from humidity.

Corona level:

Voltage – 375 volts, minimum.
Altitude – 70,000 feet.

RF high potential withstanding voltage:

Voltage and frequency: 1,000 volts rms at a frequency between 5 and 7.5 MHz, inclusive.

Leakage current: Not applicable.
Cable retention force:

</tr>
</tbody>
</table>

1/ Torque shall be applied one cable diameter from the end of the connector. Bend not applicable.

Coupling mechanism retention force: 100 pounds, minimum.

RF leakage: -60 dB, minimum, tested at a frequency between 2 and 3 GHz.

Insertion loss:

\[\text{0.06} \sqrt{\text{F (GHz)}} \text{ dB, maximum tested at 3 GHz.}\]

Part number: M39012/112 (and dash number from table I or “B” number from table II).

**TABLE II. Category B – nonfield replaceable (special tools may be required).**
