PERFORMANCE SPECIFICATION SHEET

CONNECTORS, RECEPTACLE, ELECTRICAL, COAXIAL, RADIO FREQUENCY, SERIES SSMB, PRINTED CIRCUIT BOARD MOUNT, RIGHT ANGLE

Inactive for new design after, 02 July 2012.

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the product described herein shall consist of this specification sheet and MIL-PRF-39012.

FIGURE 1. General configuration.
NOTES:
1. Dimensions are in inches.
2. Metric equivalents are given for general information only.
3. All undimensioned pictorial configurations are for reference purposes only.
4. Unless otherwise specified tolerances shall be ± .005 (0.13mm).
5. Connector bodies shall be gold plated in accordance with ASTM B488, type II, code C, class 1.27.
6. Series SSMB pin contact interface shall be in accordance with MIL-STD-348.
7. Connector bodies shall be silver plated in accordance with MIL-PRF-39012.
8. Configuration of base optional. Dimension .225 is the maximum envelope diameter.
9. Center contact shall be one piece or shall be manufactured in such a way that it is not damaged during normal manufacturing operations when the connector is soldered to a printed wiring board.

FIGURE 1. General configuration – Continued.

ENGINEERING DATA:

Nominal impedance: 50 ohms.
Frequency range: 0 to 12.4 GHz.
Voltage rating:
  250 volts rms, maximum working voltage at sea level.
  60 volts rms, maximum at 70,000 feet (4.437 kPa).
Temperature rating: -65°C to +165°C.

REQUIREMENTS:

Dimensions and configurations: See figure 1 and MIL-STD-348.
Force to engage and disengage:
  Longitudinal force: Not applicable.
  Torque: Not applicable.
Coupling proof torque: Not applicable.
Inspection conditions: Not applicable.
Mating characteristics: In accordance with MIL-STD-348.
Hermetic seal: Not applicable.
Leakage (pressurized connector): Not applicable.
Insulation resistance: In accordance with MIL-STD-202-302, test condition B, 1,000 mega ohms minimum.
Center contact retention:
  Minimum axial force: 2 pounds from mating end.
Solderability: For quality conformance inspection, the test shall be performed in group B following VSWR; test 5 samples with no failures permitted. In accordance with MIL-STD-202-208.

Corrosion (salt spray): In accordance with MIL-STD-202-101, test condition B.
Voltage standing wave ratio (VSWR): Not applicable.
Connector durability: 500 cycles minimum at 12 cycles/minute maximum.
  Initial: 6.0 pound maximum engage.
  Final: 6.0 pound maximum engage and disengage.
  1.0 pound minimum disengagement.

Contact resistance: In milliohms maximum:

Dielectric withstanding voltage: In accordance with MIL-STD-202-301, 500 volts rms minimum at sea level.

Vibration, high frequency: In accordance with MIL-STD-202-204, test condition B, 15 G’s.

Shock: In accordance with MIL-STD-202-213, test condition B, 75g’s at 6 milliseconds, ½ sine.

Thermal shock: In accordance with MIL-STD-202-107, test condition B.

Moisture resistance: Not applicable.

Corona Level: 125 V up to 75,000 feet.

RF high potential withstanding voltage:
  Voltage and frequency: 400 volts rms at a frequency at 5 MHz.
  Leakage current: Not applicable.

Cable retention force: Not applicable.

Coupling mechanism retention force: Not applicable.

RF leakage: Not applicable.

Insertion loss: Not applicable.

Part or Identifying Number (PIN): M39012/135 – (dash number from figure 1).

Group qualification: See table I.

1/ For qualification retention, where more than one part is listed in a group in this column, data may be supplied on any of these parts in order to retain qualification for those parts in the corresponding right hand column. The part used for qualification retention does not have to be the part initially qualified.
Amendment notations. The margins of this specification are marked with vertical lines to indicate modifications generated by this amendment. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations.
