PERFORMANCE SPECIFICATION SHEET

CONNECTORS, RECEPTACLE, ELECTRICAL, COAXIAL, RADIO FREQUENCY,
(SERIES BNC (UNCABLED), SOCKET CONTACT, HERMETIC SEALED,
JAM NUT MOUNTED, CLASS 2)

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the product described herein shall consist of this specification sheet and MIL-PRF-39012.

FIGURE 1. General configuration.
FIGURE 1. General configuration – Continued.
Inches | mm | Inches | mm
---|---|---|---
.022 | .56 | .368 | 9.35
.062 | 1.57 | .375 | 9.53
.087 | 2.21 | .380 | 9.65
.099 | 2.51 | .384 | 9.75
.104 | 2.64 | .493 | 12.52
.114 | 2.90 | .495 | 12.57
.153 | 3.89 | .500 | 12.70
.156 | 3.98 | .505 | 12.83
.159 | 4.04 | .508 | 12.90
.215 | 5.46 | .510 | 12.95
.218 | 5.54 | .620 | 15.75
.221 | 5.61 | .630 | 16.00

NOTES:
1. Dimensions are in inches. Metric equivalents are given for information only.
2. For dimensions ‘A’, ‘B’ and ‘C’, see table I.
3. Dimension ‘B’ is the largest overall diameter of the connector.
4. Orientation of the mounting flats and bayonet studs shall be within ± 3° of the orientation shown.
5. All undimensioned pictorial representations are for reference purposes only.
6. Interface shall be in accordance with MIL-STD-348, socket contact.

FIGURE 1. General configuration – Continued.

TABLE I. Dash numbers and overall dimensions.

1/ For cross reference of dash number to superseded PIN or type designation, see table III.

2/ Dimensions are in inches. Metric equivalents are given for information only.

X Denotes connector body plating material option. The only plating options allowable are Silver or Nickel over brass in accordance with MIL-PRF-39012. Only connectors of the same materials shall be mated to avoid dissimilar metal problems. CAUTION: A NICKEL PLATED BODY IS NOT FOR USE IN APPLICATIONS WHERE PASSIVE INTERMODULATION GENERATION (PIM) MAY BE A CONCERN. Silver is the preferred plating option.
Group qualification: See table II.

**TABLE II. Group qualification. 1/**

</tr>
</tbody>
</table>

1/ The superseded PIN or the type designation is for cross reference only. The PIN M39012/24-XXXX shall be used in all cases for marking and identifying the connector.

**ENGINEERING DATA:**

Nominal impedance: 50 ohms.

Frequency range: 0 to 4 GHz.

Voltage rating: 500 volts rms maximum working voltage at sea level. 125 volts rms maximum at 70,000 feet (4.437 kPa).

Temperature rating: -65°C to +165°C.

**REQUIREMENTS:**

Design and construction: See figure 1.

Center contacts: 4 pounds (17.8 N), minimum axial force. 4 inch-ounces (0.03 Nm), minimum radial torque.

Force to engage and disengage:

Longitudinal force – 3 pounds (13.34 N), maximum. Torque – 2.5 inch-pounds (0.28 Nm), maximum.

Coupling mechanism retention force: Not applicable.

Mating characteristics: See MIL-STD-348.
Contacts with spring members:
Center contact (female):
  Oversize test pin - .057 inch (1.45 mm) diameter minimum (non-closed entry contacts only).
  Insertion depth - .125 inch (3.17 mm), minimum.
  Number of insertions – 1.
  Insertion force test – Steel test pin diameter - .054 inch (1.37 mm), minimum.
  Test pin finish – 16 microinches (0.406 µm).
  Insertion force – 2 pounds (8.90 N), maximum.

Withdrawal force test: Steel test pin diameter - .052 inch (1.32 mm), maximum.
  Withdrawal force – 2 ounces (0.56 N), minimum.
  Test pin finish – 16 microinches (0.406 µm).

Hermetic seal: Leakage shall not exceed $1 \times 10^{-5}$ cc/s of tracer gas at atmospheric pressure when mounted in mounting hole specified on figure 1.

Leakage (pressurized connectors): Not applicable.

Contact resistance: In milliohms maximum.

<table>
<thead>
<tr>

<tr>
<td>Outer contact (Nickel plate)</td>
<td>0.4</td>
<td>Not applicable</td>
</tr>
</tbody>
</table>

Resistance to test prod damage: Not applicable.

Voltage standing wave ratio (VSWR): Not applicable.

Dielectric withstanding voltage: MIL-STD-202-301. 1,500 volts rms at sea level.

Corona level: Not applicable.

RF high potential withstanding voltage:
  Voltage and frequency – 1,000 volts rms at 5 MHz.
  Leakage current – Not applicable.

Contact durability: Insertion and withdrawal force 500 cycles minimum at 12 cycles/min maximum. The mating force shall meet the mating characteristics requirements.

  Acceleration – 50 G’s at 7 milliseconds.
  No discontinuities.
Thermal shock: MIL-STD-202-107, test condition B except low temperature shall be -55°C.

Moisture resistance: MIL-STD-202-106. No measurements at high humidity. Insulation resistance shall be at least 200 megohms within 5 minutes after removal from humidity. Dielectric withstanding voltage shall be met.

Cable retention force: Not applicable.

RF leakage: Not applicable.

Insertion loss: Not applicable.

PIN: M39012/24- (dash number from table I).

Amendment notations. The margins of this specification are marked with vertical lines to indicate modifications generated by this amendment. This was done as a convenience only and the Government assumes no liability whatsoever for any inaccuracies in these notations. Bidders and contractors are cautioned to evaluate the requirements of this document based on the entire content irrespective of the marginal notations.
