1/ Corrosion (salt spray) and contact resistance data must be submitted to DSCC-VQP before qualification approval may be granted.

NOTE: if a connector manufacturer produces a connector which meets all the requirements for two or more connector types (within the same series), the manufacturer may receive qualification approval for the two or more connector types by qualifying the one connector. It is not necessary that such connectors be in the same group. Each connector, however, must be marked with its own appropriate part number.
