PERFORMANCE SPECIFICATION SHEET

RELAYS, ELECTROMAGNETIC, ESTABLISHED RELIABILITY, DPDT, LOW LEVEL TO 2 AMPERES, TERMINALS 0.200-INCH GRID PATTERN (SENSITIVE, 100/125 MILLIWATTS, COIL OPERATE POWER AT 25°C)

This specification is approved for use by all Departments and Agencies of the Department of Defense.

The requirements for acquiring the product described herein shall consist of this specification sheet and MIL-PRF-39016.

FIGURE 1. Dimensions and configuration.
NOTES:
1. Dimensions are in inches.
2. Metric equivalents are given for general information only.
3. Unless otherwise specified, tolerance is ±0.010 (0.25 mm).
4. Indicated terminal shall be marked with a contrasting bead.
5. Circuit diagram marked on top if legible from the mounted position, otherwise marking surface is optional.
6. Mounting screw head clearance based on use of No. 4 fillister head screws.
7. Coil symbols are optional in accordance with MIL-STD-1285.
8. Mounting surface finish shall be compatible with aluminum (duralumin type) as defined by MIL-STD-889.
9. Terminal numbers in circuit diagram are for reference only. Numbers do not appear on relay.

FIGURE 1. Dimensions and configuration - Continued.
REQUIREMENTS:

Contact data:

Load ratings:

High level (relay case grounded).

Resistive: 2 amperes at 28 V dc; 0.10 ampere maximum at 115 V ac, (60 and 400 Hz).

Inductive: 0.50 ampere maximum at 28 V dc maximum with 200 millihenries.

Lamp: 0.10 ampere at 28 V dc (life test not required).

Low level: 10 µA to 50 µA at 10 mV to 50 mV (dc or peak ac).

Intermediate current: Applicable.

Contact resistance or voltage drop:

Initial: 0.050 ohm maximum.

High level:

During life: Not more than 5 percent of open circuit voltage.

After life: 0.100 ohm maximum.

Low level:

During life: 33 ohms maximum.

After life: 0.100 ohm maximum.

Intermediate current:

During intermediate current: 1 ohm maximum.

After intermediate current: 0.200 ohm maximum.

Contact bounce: 2 milliseconds (ms) maximum. (Applicable to failure rate level "L").

Contact stabilization time: 2.5 ms maximum. (Applicable to failure rate levels "M", "P", and "R").

Overload (high level only): Two times rated current.

Coil data: (See table I).

Operate time: 6 milliseconds maximum over temperature range with rated coil voltage.

Release time: 5 milliseconds maximum over temperature range from rated coil voltage.
Electrical data:

Insulation resistance: 1,000 megohms minimum.

Dielectric withstanding voltage:

Between case, frame, or enclosure, and between all contacts in the energized and deenergized positions -
Between case, frame, or enclosure and coil(s) -
Between all contacts and coil(s) -
Between open contacts in the energized and deenergized positions -
Between contact poles -

Environmental data:

Temperature range: -65°C to +125°C.

Vibration (sinusoidal): MIL-STD-202-204, test condition D (except 10 to 2,500 Hz). Contact chatter shall not exceed 10 microseconds maximum for closed contacts and 1 microsecond maximum closure for open contacts.

Vibration (random): MIL-STD-202-214, test condition IG. Contact chatter shall not exceed 10 microseconds maximum for closed contacts and 1 microsecond maximum closure for open contacts (applicable for qualification and group C testing only).

Magnetic interference: Applicable.

Resistance to soldering heat: Applicable.

Acceleration: Applicable.

Physical:

Dimensions and configurations: See figure 1.

Weight: 13 grams (0.46 ounce) maximum.

Terminals: See figure 1 and table I.

Terminal strength: 3 ±0.3 pounds pull.

Solderability: Applicable.

Terminal twist test: Applicable to wire leads.
MIL-PRF-39016/44F

Life test requirements:

High level: 100,000 cycles.

Low level: 100,000 cycles, plus 900,000 cycles mechanical life.

Part or Identifying Number (PIN): M39016/44-(dash number from table I and suffix letter designating failure rate level).

</table>

1/ Each relay possesses high level and low level capabilities. However, relays previously tested or used above 10 mA resistive at 6 V dc or peak or open circuit are not recommended for subsequent use in low level applications.

2/ The suffix letter L, M, P, or R to designate the applicable failure rate level shall be added to the applicable listed dash number. Failure rate level (percent per 10,000 cycles): L, 3.0; M, 1.0; P, 0.1; R, 0.01. Example, 004L - - - 004R.

3/ CAUTION: The use of any coil voltage less than the rated coil voltage will compromise the operation of the relay.

4/ The sensitivity is 100 milliwatts.

5/ The sensitivity is 125 milliwatts.
Qualification inspection:

Qualification inspection and sample size: See tables II and III.

### TABLE II. Qualification inspection and sample size. 1/

</tr>
<tr>
<td>Qualification inspection as applicable.</td>
<td>Qualification inspection as applicable.</td>
</tr>
</tbody>
</table>

1/ The number of units required for qualification testing shall be increased as required in Q5, table II, MIL-PRF-39016, if the relay manufacturer elects to test the number of units permitting one or more failures. Prior to performance of qualification inspection testing, the relay manufacturer shall preselect the sampling plan.

Qualification inspection (reduced testing): See table III.

If the relays produced for MIL-PRF-39016/44 are similar in construction and design, except for the coils, to the relays produced for MIL-PRF-39016/6, then reduced testing for qualification of MIL-PRF-39016/44 relays may be performed concurrent with or subsequent to successful qualification of MIL-PRF-39016/6 relays.

### TABLE III. Qualification inspection (reduced testing).
