TABLE I. Dash number and applicable cable – Continued.

- * Not for Naval Air Systems Command (AS) use.
- 1/ The "X" is placed in the dash number to allow the user connector body plating options provided in the general specification. Only connectors of the same materials are to be intermated to reduce the possibility of dissimilar problems, including galvanic corrosion.
- 2/ The latest version of each cable shall be applicable.
- 3/ These connectors have captivated center contacts.
- 4/ These parts are no longer restricted from Navy use.
- 5/ Preferred keying arrangement.
- 6/ Inactive for new design (see table III).
- 7/ Cables to be used for the +200°C thermal shock test.
- 8/ These connectors are assembled using the applicable crimping tool to the specified cables.
- 9/ Complete connector assembly shall consist of a body, center contact, intermediate contact, ferrule, and assembly instructions.

Corona level:

Altitude: 70,000 feet (4.437 kPa).

Voltage: 200 V rms minimum.

RF high potential withstanding voltage:

800 V rms, between center conductor and intermediate conductor.

200 V rms, between intermediate conductor and outer conductor at 5 MHz to 7.5 MHz.

Leakage current: Not applicable.

Cable retention force (for cable .200 inch (5.08 mm) to .325 inch (8.25 mm) outside dimension): 40 pounds (177.93 N) minimum.

Coupling mechanism retention force: Not applicable.

Rise time degradation: 400 picoseconds maximum. (Not applicable to connectors using twin conductor cables.)

TABLE II. Group qualification. 1/

Groups	Submission and qualification of any of the following dash numbers	Qualifies the following dash numbers
I	X*01 X*02 X*05 X*06 X*09	X*01 X*02 X*05 X*06 X*09
II	X*03 X*04 X*10 X*11	X*03 X*04 X*10 X*11

V	X*16 X*17	X*16 X*17
VI	X*19 X*20	X*19 X*20
VII	X*12 X*21	X*12 X*21
VIII	X*22 X*23	X*22 X*23

1/ If a connector manufacturer produces a connector which meets all the requirements for two or more connector PIN's (within same series), the manufacturer may receive qualification approval for two or more connector PIN's by qualifying the one connector. It is not necessary that such connectors be in the same group. Each connector, however, must be marked with its own appropriate PIN. For group qualification, the connectors must be of similar design. Qualification of connectors qualifies connectors of the same body material and finish only. "X" designates body material and finish. The "*" designates keying (see MIL-PRF-49142).

- 1/ The "X" in the dash number refers to body material and finish combinations. Only connector combinations of the same material and finish allow for retention of that specific connector. Refer to the basic specification for the material and finish requirements.
- 2/ The "*" signifies connector keying configuration. Only one keying configuration is required to retain all keying combinations.
