[1/](#) For retention of qualification or extension of qualification to lower failure rate levels, all life test data accumulated on [MIL-PRF-83536/8](#) may be used in addition to [MIL-PRF-83536/7](#) data. Prior to performance of retention of qualification testing, the relay manufacturer shall preselect the sampling plan.

[2/](#) The number of units required for qualification testing shall be increased as required in group V, table II of [MIL-PRF-83536](#), if the contractor elects to test the number of units permitting one or more failures. Prior to performance of qualification testing, the relay manufacturer shall preselect the sampling plan.
