RE: Notification of Qualification, MIL-PRF-23419/2, Fuses, FSC 5920; VQ(VQH-14-027771),
CN# 042318

Dear Mr. Echeverria:

We have completed our review of your qualification test report 23419-4153-14 in accordance with MIL-PRF-23419E requirements. The test results for the subject device types submitted have been approved, and they are listed below. Qualification of your products is issued under the current issue of Military Specification, as a result of your successful qualification testing in accordance with the test report number listed in the Qualification Reference Section below. Therefore, your products will be listed as shown below on Qualified Products List (QPL) 23419.

Designation Government	Designation Manufacturer's	Reference Qualification	Sheet Specification	Name and Address Manufacturer's
FM02A 125V 1/500A	274.002	23419-4153-14	/2	Littelfuse Corporation
FM02A 125V 1/200A	274.005			Venustiano Carranza 2501

FM02A125V4A	274004			
FM02A125V5A	274005			

Plant: Same

This qualification approval is subject to the conditions and restrictions as stated in DOD Manual 4120.24-M, SD-6 and as listed below.

Qualification of your materials and processes is granted effective March 19, 2014 under the current issue of the Performance Specification MIL-PRF-23419, Fuses, Cartridge, Instrument Type, FSC 5920. This action is a result of successful qualification in accordance with test report number 23419-4153-14.

To maintain this listing as specified in paragraph 4.4.4, retention of qualification, you are required to provide a retention report every thirty-six months. The standard reporting period is from January 1 through December 31. Your first reporting period is from Jan 1, 2014 through December 31, 2016.

The report shall include the following:

a. Identification by PIN, quantity, date code, and lot number(s) that have completed Groups A, B, and C inspections. The lots shall be organized so that the QPL listing that is being retained is readily identifiable. Information should be formatted such that the periodic CI and PI tests and lots are clearly presented. The original data must be retained by your company and is to be made available to authorized government representatives upon request.

b. A list of all QPL device part numbers for which there has been no CI or PI. Your company must certify that you still have capabilities and facilities to produce items using these processes and materials to the qualified level or have these device part numbers removed from the QPL.

c. A summary of failure analysis results and corrective action of failures, which result in changes to your QPL listing. Also, the documentation detailing identification of lots that failed either PDA, CI or PI, and confirmed lot failures.

d. Certification that the design and construction of all compliant product was verified and found to be identical to QPL requirements and that the CI and PI requirements have been met.

If the summary results indicate nonconformance with the requirements of MIL-PRF-23419, and acceptable corrective action has not been taken, we may remove the failing device part numbers from the QPL. If during two consecutive reporting periods, there has been no CI and PI of product using QPL processes and materials on the certified line(s), you may be required at our discretion, to perform supplemental process qualification testing. Failure to submit the summary report within 60 days from the 36-month period may result in loss of your QPL listing and certification. A DD Form 1718 may be used for this report with those products not produced during the reporting period.

Because we are held responsible for the accuracy and currency of this QPL, please let us know if your company discontinues production.

If you have any questions, please contact Mr. Rudd at (614) 692-0594.

Sincerely,

/SIGNED/

JOSEPH GEMPERLINE
