

QUALIFIED MANUFACTURERS LIST
OF
PRODUCTS QUALIFIED UNDER PERFORMANCE SPECIFICATION
MIL-PRF-38534
HYBRID MICROCIRCUITS,
GENERAL SPECIFICATION FOR

This report has been prepared to show the products qualified to MIL-PRF-38534 as of the date of this report. Listing of a product is not intended to and does not connote endorsement of the product by the Department of Defense. All products listed herein have been qualified under the requirements for the product as specified in the latest effective issue of the applicable specification. This list is subject to change without notice; data will be updated as necessary. The listing of a product does not release the supplier from compliance with the specification requirements.

The Qualifying Activity for this specification is the Defense Supply Center Columbus (DSCC-VQ), P.O. Box 3990, Columbus, OH 43218-3990.

In order for a manufacturer to have test data considered for qualification, the manufacturer must perform all required qualification tests; produce the qualification sample with DSCC certified materials and manufacturing construction techniques; and comply with the requirements specified in MIL-PRF-38534.

The listing of custom hybrid microcircuit materials and manufacturing construction techniques in QML-38534 applies only to products produced on the MIL-PRF-38534 certified line(s) at the plant(s) specified on the QML.

Custom hybrid microcircuits manufactured, assembled, and tested in accordance with MIL-PRF-38534 shall bear the "certification mark" for SMD controlled hybrid Microcircuits, or the "compliant hybrid" certification mark for non-SMD controlled hybrid microcircuits as follows:

- SMD product, for all classes, shall have the certification mark "QML" or "Q" for small devices.
- Non-SMD product dated after MIL-PRF-38534D, for Class K shall have the certification mark "CK."
- Non-SMD product dated after MIL-PRF-38534D, for Class H shall have the certification mark "CH."
- Non-SMD product dated after MIL-PRF-38534D, for Class G shall have the certification mark "CG."
- Non-SMD product dated after MIL-PRF-38534D, for Class E shall have the certification mark "CE."
- Non-SMD product dated after MIL-PRF-38534D, for Class D shall have the certification mark "CD."
- Non-SMD dated prior to MIL-PRF-38534D, for all classes, shall have the certification mark "CH" or "C" for small devices.

These certification marks or the abbreviations "Q" or "C" shall not be used on product that does not meet all requirements of MIL-PRF-38534 except as allowed in 3.7.5 of MIL-PRF-38534.

Products manufactured, assembled, and tested for Class K, Class H, Class G, Class E, or Class D, with all the provisions of MIL-PRF-38534, and with DSCC qualified materials and manufacturing construction techniques, can be represented as being compliant to the appropriate product assurance levels as listed herein.

The information contained in this QML reflects the general material and manufacturing techniques of the particular test sample(s). In order to protect the manufacturers' proprietary processes and materials, only the generic process and material are listed. The user must contact the manufacturer for any detail information on specific materials (i.e., such as epoxy, getter, solder-type), or process details. Processes and materials, not listed, may be considered qualified by similarity to those demonstrated for the qualification (e.g., different wire, package, or die sizes). See Appendix E of MIL-PRF-38534, Class I, major changes paragraph, for a baseline of qualification limits.

Any product, represented as being compliant to MIL-PRF-38534, must be built using qualified processes and materials. The user shall be responsible for determining if the qualification baseline for a given class level is adequate to demonstrate capability for the intended application.

To obtain MIL-PRF-38534 qualified hybrid microcircuits, the user should specify in the procurement document that the product be manufactured to MIL-PRF-38534, and be comprised of materials and manufacturing construction techniques listed herein. Acquisition requirements are contained in paragraph 6.2 of MIL-PRF-38534. Microcircuit devices represented as being built, tested and shipped under the QML provision of MIL-PRF-38534, must be built using qualified manufacturing materials and construction listed in this QML.

Contractor acquiring activities, military program offices, and other government representatives can determine if hybrid microcircuits meet the requirements of MIL-PRF-38534 by:

- a. For SMD controlled product: Product listed in the product eligibility section herein and marked with "QML" or "Q".
- b. For non-SMD controlled Product: The part will not be listed on the QML. However, the part will be marked with "C" plus the Class Level designator".

Warning! If products were not purchased to, and identified as MIL-PRF-38534 QML, do not assume they have been manufactured on the DSCC certified line, with qualified materials and processes, or that all other MIL-PRF-38534 requirements were performed.

To determine whether new SMD controlled products are in accordance with MIL-PRF-38534, or to verify any new process/material qualifications, you may call the qualifying activity (DSCC-VQ).

DSCC-VQ ISO Registrations are also listed herein. However, QML listed manufacturers may have ISO registrations from other registrars.

This Qualified Manufacturers List (QML) is available from the DSCC-VQ World Wide Web pages.

Detailed Information about QML-38534:
<http://www.dscclia.mil/programs/qmlqpl/QPLdetail.asp?qpl=38534>

Notes:

- 1/ The QML listing can be expanded provided appropriate qualification testing is performed and passed. Therefore the manufacturer may accept an order for compliant product not covered by his QML listing, but shall not ship the compliant product until the testing has been successfully completed.
- 2/ Package seal perimeter is listed by largest perimeter successfully tested in inches.
- 3/ Package lead counts are listed by maximum number of leads covered by qualification.
- 4/ Caution. Do not use this number for item acquisition. Item acquired to this number may not satisfy the performance requirements of the listed SMD.
- 5/ Inactive for new design, no longer available from manufacturer.
- 6/ Class E devices are devices, which meet all of the requirements of one of the other classes (K, H, or G), with some exceptions taken. Therefore any manufacturer qualified to G, H or K is eligible to produce and mark product as compliant to class E.

Assembly Information: See Note 1/

Assembly Flows: General Process Flow Chart Hybrids RSL Ltd.

Substrate Attach: Solder, Nonconductive Epoxy

Element Attach: Conductive Epoxy, Solder, Nonconductive Epoxy, Eutectic

Add-on Elements: Unpackaged Die, Chip Capacitors, Tantalum Capacitors, Tabs, Electrical Connections

Wire Bonding: Gold, Aluminum, Ribbon

Package Information: See Notes 1/ 2/ 3/

Package Information: Metal Package, Flatpack, Seam Weld, 8.38 Inch Seal Perimeter, 20 Leads, Gold Lead Finish

Standardized Microcircuit Drawing (SMD) Approved Source Master Product Listing

PRODUCT ELIGIBILITY: The manufacturers listed in table 1 have certified that the Hybrid Microcircuits are built, tested, and shipped using MIL-PRF-38534 CERTIFIED FLOW/QUALIFIED MATERIALS and MANUFACTURING TECHNIQUES and are in FULL COMPLIANCE with MIL-PRF-38534 requirements.

Defense Supply Center, Columbus
